## Customer Reviews

A friend recommended this book after mom had been diagnosed with stage 4 cancer. I ordered it after going out of state to take care of her. Sadly the disease progressed so quickly that I only had a chance to ask a few questions. But the stories she told me will be forever etched in my mind, as well as in the book. I actually used those answers when I spoke at the funeral to tell people who Mom really was because they gave so much insight to her personality. It is beautifully made and well laid out. You don't have to ask questions all in order...I didn't because time was so short. But the book has questions you never would have thought of asking, therefore teaching you more about her life, her past, her family, thoughts, and things she cared about the most. I highly recommend that you buy this book and start asking the questions before it is too late and you are no longer able find these things out. It gave mom a chance to think and talk about pleasant memories to distract from her pain. It also made me feel closer than ever to her.

My daughter and now son-in-law got this for me to give back to them. This is great! A fun and easy way to share your life story, if you will, with your children, and generations down the road! Extra pages for you to "do your own thing", places for pictures, etc...

The book is much larger than I thought it would be. I mean actual book, not number of pages, but I'm not complaining! I love them! The books were great quality and interesting.

This is a great book. I gave it to my niece for her to complete for her son. One day he will treasure her story and memories.

has great prompts for your loved one - the rest of the review is on them, not the seller. Really - you want to give this to your mom - or a friends mom... the older you get, the further away from "story time" you get to experience. Remember, the older you get, the more your mother is willing to talk to you about... don't let separation keep you from passing down the family history. This book is fantastic.

It's wonderful. I bought it for my daughter in law to use for their new baby to read in the future.

bought this as a gift. it is a beautiful book that will become more beautiful for the recipient after mom fills in her details

I love the quality of it , go tit for my mother in law on mothers day she loved it thought it was cute. I highly recommend I plan on buying another in the future for she can write in in for her future grandkids.
