Cardiac Transplantation: A Manual For Health Care Professionals

Synopsis

Over the past ten years, cardiac transplantation has evolved from an experimental procedure performed in a handful of university centers to a viable therapeutic modality now performed in more than 150 centers worldwide. The complexity of the procedure, the changing immunosuppressive regimens, and the follow-up care have necessitated a multidisciplinary approach involving a variety of medical, nursing, and social sciences specialties and subspecialties. In addition, health care trainees and referring physicians are increasingly becoming involved in the care of the cardiac transplant recipient. This book does not attempt to be a comprehensive treatise on cardiac transplantation; rather, we hope that it will serve as a manual and guideline for all health professionals involved in cardiac transplantation. JEFFREY D. HOSENPUD, M.D. Contents Preface v Contributors IX 1. Cardiac Transplantation: An Overview JEFFREY D. HOSENPUD AND ALBERT STARR Immunogenetics and Immunologic Mechanisms of 2. Rejection 15 DOUGLAS J. NORMAN 3. Medical Therapy Tailored for Advanced Heart Failure 33 LYNNE WARNER STEVENSON 4. Ventricular Assistance as a Bridge to Cardiac Transplantation 53 D. Customer Reviews

There does not seem to be any discussion on how to manage the heart blood type errors that result in the patient's death that occur with heart transplants under the direction of the primary author of this manual. Dr. Adnan Cobanglu is the foremost expert in the creation of such a deadly error and the management of death that can result. Of the three recorded misblood type errors regarding heart transplants (two resulting in death), Dr. Adnan Cobanoglu was directly involved in two of them. However he was the surgeon who taught the skill set on how to create such an error to the doctor responsible for the third heart blood type error. That transplant also resulted in a death. Seems to be the such a textbook.. having such incredible expertise available through the primary authors.. in the hastening of a patient's death by creating a blood type error, should be part of the discussion within this book.
