# Exploring Biological Anthropology: The Essentials (3rd Edition)

## Synopsis

From foundation to innovation: discover the best of biological anthropology. Over the past 40 years, the study of biological anthropology has rapidly evolved from focusing on just physical anthropology to including the study of the fossil record and the human skeleton, genetics of individuals and populations, our primate relatives, human adaptation, and human behavior. The 3rd edition of Exploring Biological Anthropology combines the most up-to-date, comprehensive coverage of the foundations of the field with modern innovations and discoveries. A better teaching and learning experience This program will provide a better teaching and learning experience for you and your students. Here's how: Personalize Learning - The new MyAnthroLab delivers proven results in helping students succeed, provides engaging experiences that personalize learning, and comes from a trusted partner with educational expertise and a deep commitment to helping students and instructors achieve their goals. Improve Critical Thinking - This text provides students with the best possible art, photos, and maps for every topic covered in the book, helping them gain a better understanding of key material. Engage Students - "Insights and Advances" • boxes and "Innovations" • features help students develop an appreciation for the excitement of discovery. Support Instructors - MyAnthroLab, an author-reviewed Instructor's Manual, Electronic "MyTest" • Test Bank, PowerPoint Presentation Slides, and Pearson Custom course material are available to be packaged with this text. Additionally, we offer package options for the lab portion of your course with Method & Practice in Biological Anthropology: A Workbook and Laboratory Manual for Introductory Courses, or Atlas of Anthropology. Note: MyAnthroLab does not come automatically packaged with this text. To purchase MyAnthroLab, please visit: [www.myanthrolab.com](http://www.myanthrolab.com).

## Customer Reviews

Craig B. Stanford is Professor of Biological Sciences and Anthropology and Co-Director of the Jane Goodall Research Center at the University of Southern California. John S. Allen is Research Scientist at Dornsife Cognitive Neuroscience Imaging Center and the Brain and Creativity Institute, University of Southern California.

Did not enjoy reading this book, honestly wish my professor picked another book for her class but unfortunately got stuck reading this. Text is difficult to keep up with maybe i don't like this book because i don't enjoy this major but overall i think the book could have been organized better. If you are looking for a good book to read and teach yourself a little about anthropology, do yourself a favor and decide against this textbook!

I didn't expect the book to be falling apart, there's a lot of pages coming off and it's kind annoy to have to hold the pages to read.

It was a fair buy for price. It arrived with pages and front cover warn down it has all the pages some writing in the book but I can still read the text and it's doable for being used.

great book!

There are so many oddly written passages in the book that I'm wondering if English is not the authors' first language, or if they're just lazy, or if they hired a bad editor. Many topics are poorly explained, poorly illustrated, and aren't used together in effective ways to convey concepts. I'm glad I only rented it.

I returned this book already almost 2 weeks ago but I've charged late fee. I don't know where to ask about my situation.

The textbook was new and in great condition, and it arrived very quickly which was great because I needed this book for an online class. Only negative is that you could tell that the book came with

and online CD and it was ripped out of the plastic covering

The book perfectly fit my class which was an anthropology class. And a great price. I almost bought this at the bookstore at my school for over 100 bucks. So this price was a steal.
