Customer Reviews

Very Helpful! I've been a nurse for 12 years, and specializing in cardiology for 2 years. This will help me feel more confident and be handy for everyone on our staff- I'm keeping it at my desk for everyone's reference. Thanks! *Fast Shipping!*

I wanted something I could carry with me so I can review on the go and this lovely laminated card is perfect! The price was just as compelling as the product! Thank you!

I yesterday received this Quick Study concerning the Heart, and I must admit that it's extremely good with all the details we are getting in the 12 drawings. Concerning doctor and health books I among other also own a Mosby's Dictionary, but this double side Quick Study is easier to have by the hand when in a book reading about the Heart. And especially it's good when I to persons have to explain something concerning the Heart, mostly the Cardiac Veins.

Purchased for my daughter who is in nursing school and she found it to be very helpful in her anatomy class.

Thoroughly and accurately defined anatomy. Wish it were bigger but it does fit your standard binder and is hole punched.

Love these quick study cards. Laminated so they stay nice and accurate.

excellent quick reference guide for reviewing before exams.

I just wish I had ordered these before taking my Medical Assisting Course. They are perfect for quick references and because they are laminated they will last and can be used at the place of employment. I acquired them to assist me in preparing for my certification test that is coming up pretty quick. I am very pleased with the product.
