Customer Reviews

Two buddies bumble around eastern Asia and return to warn us against an economic onslaught of dragons. "Despite the staleness of Kelly and London's news, their anecdotes vividly illuminate the tremendous drive to succeed that characterizes the Asians they write about," maintained PW.

Copyright 1990 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title.

This book while very much American in it's point of view is actually quite an informative background into the cultures of these SE Asian nations. The book takes you on a thinking tourists point of view while mixing interviews with personal points of view, you find yourself more informed as to what makes Americans different in their thinking to these other cultures as well as how we're very much driven by the same desires...though solving the quests for the objects of our desires quite differently. My wife and I visited these countries after reading this book and found the insights helpful in enjoying these cultures even more!

Full of terrible Asian stereotypes, and more about their sex tourism than Asia's economic growth. Not what I was expecting, and very offensive.
