Customer Reviews

First released onto the market 2 years ago, Paul's courses have met with huge success: Review of Paul Noble Method by The City Magazine: "Relaxing and listening to the CDs, I found that I seemed to absorb the phrases taught, without even consciously trying, and quickly felt confident enough to play around with the different components and make my own sentences." Reviews by customers: "This is the most remarkable language course imaginable. I've tried several courses but this is on another planet. It is amazing!!!" "Paul Noble has a very relaxing and informal style to his teaching... I can already tell that my spoken French has improved permanently." "At last, an easy way to learn a language! Easy to understand plus an easy one to pop into the car CD player and use on the move, so no more 'I haven't the time...'" "The language is explained in a simple way and the teacher doesn't use complex grammar terms... For me, though, the absolute best thing about it is that it has allowed me to speak in full, proper sentences in French... A fantastic course and a well deserved 5 stars!" "I am pleased to report that this is really good fun to use because as you listen you are encouraged to CREATE VOCABULARY AND PHRASES FOR YOURSELF out of the bits of structure that you are picking up. Not only is it a completely non-threatening process but it is also

entertaining in itself." "For those who love languages but struggle to learn them this is a wonderful resource."

Who is Paul Noble? Paul Noble is a genius, yet he still left school unable to speak a language - he found that the traditional learning methods left him feeling 'confused, incapable and unable to really say anything'. Determined that there must be a better way to learn, Paul spent years devising his own unique method of learning languages which cuts out all of the grammar, all of the rote learning, and all of the stress. He began using his method to teach in his Language Institute and, hundreds of students later, he prides himself on never having had a student fail.

Awesome approach, diving right in to everyday conversational verbs and topics that allow you to quickly speak some real Spanish and build confidence. After three CDs of another product I came home and told my kids at the dinner table in Spanish, "I drink milk". After 3rd Noble CD I told them "I have prepared dinner for you and you have to eat the chicken"

Usually the present tense is what is taught first but these CDs are a little unorthodox. Paul Noble uses the past tense (actually the present perfect) in the beginning. He has a reason for using this tense first which I found in CD 10. He uses many tricks to learning the different tenses and one of them incorporates the present perfect tense. His method of teaching is very smart. I am remembering everything Paul is teaching because I only have to remember the tricks. You would think this 12 cd audio program would have more information on it, but because it gives you time to answer questions that is not the case. I have to say this is the only way to learn. I don't care how much learning information is on this 12 CD set because I am learning everything at a great price. Yes! everything thing. Why does it take a simple European audio program to do what all the American programs have not done for me? Now, I know why all the Europeans know how to speak many languages because it is their education system. Great feature is having two Translators: First Translator - South American Spanish Second Translator- European Spanish The CD box is poorly designed with each CD placed on top of each other and almost touching. I feel in time this design will scratch the cds. In conclusion, This is the only way to learn Spanish: Step one- teach, Step two- question me, step three -I answer, and Step four- then I am given the answer in two forms of Spanish. Five Stars outstanding!

I use it in the car on the way to work. It's amazing how much you remember and how easy it is.

I love these CDs! Excellent technique for learning Spanish.

Great learning method I highly recommend this product , Paul noble definitely makes it easy to learn & simple at 1st u may think it's bit confusing but later on it all makes sense & u will be just amazed how you remember things , his method is genius

I'm a big fan of Pimsleur Spanish but found myself forgetting why things are said certain ways because Pimsleur rarely discusses rules. Paul Noble uses many similar memory techniques and principles as Pimsleur but his approach is different. He gives more memory aids and associations to remember why things are said a certain way. You don't even have to remember these because he'll remind you again right as you forget. There is more repetition and practice on core rules - especially when it comes to past and present. He doesn't provide a massive vocabulary but does provide a good foundation for how the language works. The lessons are presented in context of typical tourist situations. Some of it seems too simple but the reason becomes clear later as he begins to build more complex past and future sentence structures. If you are getting stuck with Pimsleur this is a refreshing companion CD set that will clarify what's been confusing you. Available on Audible.com so you can get this at a good price if you buy bulk credits.

I love it when my wife comes downstairs and shares her recent lesson(s). As an Argentine, I truly appreciate that one of the speakers represents true Spaniard Castilian. The other speaker represents Spanish as is more common in the New World. Relevant topics are taught (credit cards, anyone?)

I wanted to learn some Spanish for a trip to D.R. I found these as audible books and enjoyed listening to them. It was very easy to follow and I found I picked up a lot without even trying. I have now gone thru the first 3 and look forward to the next. I was happy to be able to speed it up at times as well as slow it down when needed.
