Age Range: 4 - 8 years

Grade Level: Preschool - 3

Customer Reviews

I was a child of the early 80's, and this was my favorite book as a small child. I bought this for my 5 year old son because I thought he'd appreciate it just as much. First off Bony-Legs is way creepier than most villains in children's books nowadays. She looks like a complete creeper. She's a great character. Secondly, despite this is meant to be a bit creepy, it has a good message....that being kind and caring about others really pays off. I have to say that the illustrations are awesome. I flipped through the book numerous times just to see the illustrations I remember from my childhood. Such cool pictures. Anyway, buy this book!

Hungry, Hungry Sharks (Step-Into-Reading, Step 3) This book is a little bit dated and doesn't include new information learned about sharks. It says they can't stop swimming or they will sink. I think this has been dis-proven. It also doesn't address the problem of sharks being killed for their fin or because people don't like them and how they are becoming endangered. None of that info is in the

book. In fact it says they have been here since dinosaur time and they will always be here. But other than that it does have enough info for my 4 year old who loves to learn about animals. It has drawings instead of photos. It shows different types of sharks. The book touches on the subject of sharks attacking people without being gory. This book says all kinds of non food has been found inside sharks. Actual items found are MINK coat, treasure chest of jewels, suit of armor, barrel of nails. This is our favorite part.

A great story that's no longer in print and I had the 1st edition! So we bought it because it is a great book. We love her metal teeth and her house is on chicken legs, hahaha. Any questions please ask and helpful votes are much appreciated, thank you.

My son is currently 6 years old and in 1st grade. He was able to read 98% of this book on his own (a little easier than expected). He was very interested in this book and it did a good job breaking down the point without going into too much depth which would take away his interest.

I love these series. But most important that my son does. I order 20+ books and he loves to read them (usually it is not that easy to make him read). I got mix of 2-3-4 levels for the second grader, second level is too easy, but it creates some fun and he reads them with pleasure. Love it, I would recommend it.

My 4 children grew up with this book and I read it to them often. I kept the one I have but now that they are having children, I need 3 more copies as I want all of my children to have a copy to read to their children. This copy is in the condition I expected as was described. It is a bit worn but that shows that it was appreciated and used. Just like my original copy. I gave it to my son to read to his son and he was thrilled. Very happy with my purchase and it was delivered in a timely manner.

Thank-you! Thank-you! Thank-you! This was my favorite book as a child. The first book I checked out from the library...I've searched for years to have a copy of my own, and having it in hardcover makes it seem even more special than the paperback I once held. As soon as I opened it I sat down and read the story to my son, scary witch voice and all. He enjoyed it too...it was wonderful to see his surprise and excitement over the parts in the story that were always my favorite as well.

Thank-you! Whoever it belonged to and had to part with it, whoever took the time to package and send it, and whoever delivered it safely back into my life....Thank~you.

Perfect book for my 3rd grader to read and pull information for a small writing prompt about sharks. They needed 3 sources and we used this as one. Great info & easy to read. Also interested my 2 younger boys which was an added bonus.
