Forensic Toxicology: Principles And Concepts

Synopsis

Forensic Toxicology: Principles and Concepts takes the reader back to the origins of forensic toxicology providing an overview of the largely unchanging principles of the discipline. The text focuses on the major tenets in forensic toxicology, including an introduction to the discipline, fundamentals of forensic toxicology analysis, types of interpretations based on analytical forensic toxicology results, and reporting from the laboratory to the courtroom. **Forensic Toxicology** also contains appendices covering the principles of pharmacokinetics and pharmacodynamics, immunology and immunological assays, toxicogenomics, and case studies. Significant emphasis on the fundamental principles and concepts of forensic toxicology Provides students with an introduction to the core tenets of the discipline, focusing on the concepts, strategies, and methodologies utilized by professionals in the field Coauthored by a forensic toxicologist with over 40 years of experience as a professor who has taught graduate courses in forensic and analytical toxicology and who has served as a consultant and expert witness in civil and criminal cases The book's companion website, <http://textbooks.elsevier.com/web/Manuals.aspx?isbn=9780127999678> features exclusive web-based content

Book Information

Hardcover: 376 pages

Publisher: Academic Press; 1 edition (January 29, 2016)

Language: English

Customer Reviews

"...the text certainly meets its aim and I would recommend students studying forensic toxicology to view this as a useful reference book." --Interfaces "...a very useful reference for students, professionals, and instructors. It provides a synthesis of scientific and ethical methods as they apply

to the field of forensic toxicology. This book appears to be unique in this regard. Score: 83 - 3 Stars"
--Doody's

Dr. Nicholas T. Lappas, an Associate Professor in the Department of Forensic Sciences at the George Washington University, has extensive experience and demonstrated expertise in both the teaching and practice of forensic toxicology. In 1975, Dr. Lappas, was one of the first two full time faculty members appointed to the faculty of the Department of Forensic Sciences at the George Washington University. Prior to this appointment, he was a forensic toxicologist in the Allegheny Coroner's Office in Pittsburgh, Pennsylvania. At GWU, he developed the MFS program in forensic toxicology, through which he has mentored hundreds of students and taught several graduate courses, including Forensic Toxicology, Analytical Toxicology, Medicinal Chemistry and Forensic Serology. Dr. Lappas's research interests have been focused on the development of analytical toxicology methods and the evaluation of factors that influence the interpretation of analytical toxicology results. His professional activities include serving as a forensic toxicology consultant in more than 500 criminal and civil cases and as an expert witness in more than 100 cases. Dr. Courtney M. Lappas, an Associate Professor of Biology at Lebanon Valley College, has extensive experience teaching and mentoring undergraduate students while maintaining an active research program. An Immunopharmacologist, Dr. Lappas teaches Molecular Biology, Immunology and General Biology. Previously a Fellow at the National Institutes of Health, Dr. Lappas's research interests are translational in nature and focus on the utilization of novel pharmacological tools in the treatment and/or prevention of immunological pathologies.

I'm not a forensic toxicologist, but I wanted to learn more about the field so I read this book. I found it to be very clear and informative!

I love how beautiful this looks They shipped quickly, goods packaging is also very fine, This works so much better than I thought it would. You can't do better for the price. If you want an economical and cost items will never miss it. I will be buying more in the future. Great quality and delivered on time. I was surprised how quick I got both packages! Fast delivery!
