Maine To Greenland: Exploring The Maritime Far Northeast

Synopsis

Maine to Greenland is a testament to one of the world's great geographic regions: the Maritime Far Northeast. For more than three decades, William W. Fitzhugh and Wilfred E. Richard have explored the Northeast's Atlantic corridor and its fascinating history, habitat, and culture. The authors' powerful personal essays and Richard's stunning photography transport readers to this vibrant region, joining Smithsonian archaeological expeditions and trekking in vast and amazing terrain. Following Fitzhugh and Richard's travels north—from Maine to the Canadian Maritimes, Newfoundland and northern Quebec, then to Labrador, Baffin and Ellesmere islands, and Greenland—we view incredible landscapes, uncover human history, and meet luminous personalities along the way. Fully illustrated with 350 full-color photographs, *Maine to Greenland* is the first in-depth treatment of the Northeast Atlantic corridor and essential for armchair travelers, locals, tourists, or anyone who has journeyed there. Today green technology, climate change, and the opening of the Arctic Ocean have transformed the Maritime Far Northeast from an icy frontier into a global resource zone and an increasingly integrated international crossroads. In our rapidly converging world, we have much to learn from the Maritime Far Northeast and how its variety of cultures have adapted to rather than changed their environments during the past ten thousand years. *Maine to Greenland* is not only a complete account of the region's unique culture and environment, but also a timely reminder that amidst the very real consequences of climate change, the inhabitants of the Maritime Far Northeast can show us grounded and sustainable ways of living.

Customer Reviews

"The book is a must for anyone who loves this part of the world or, for that matter, who cares about climate change, sustainability and the future of the planet."- Chicago Tribune"Richardâ€™s magnificent photographs especially make it a handsome addition to the coffee table, a subtitle of which might have been, 'Everything you wanted to know about the region, but didnâ€™t know you wanted to know.' ... The Smithsonian has done its researchers proud with a book that is beautifully produced and designed. Anyone with any interest in the Maritime Far Northeast will find Maine to Greenland as rich a treasure trove as the lands it explores so attentively."- Portland Press Herald

WILLIAM W. FITZHUGH is the director of the Arctic Studies Center and curator in the Department of Anthropology at the Smithsonian's National Museum of Natural History. Fitzhugh has conducted archaeology from Maine to Greenland and is currently excavating Basque and Inuit sites in Newfoundland and the Gulf of St. Lawrence. WILFRED E. RICHARD is a geographer with a concentration in environmental studies, photographer, and Registered Maine Guide. Richard is a research collaborator with the Smithsonian's Arctic Studies Center, a research fellow at the Uummannaq Polar Institute in Greenland, and serves on the board of the Maine chapter of the International Appalachian Trail.

Great way to prepare for our upcoming trip!

"Maine to Greenland" is a fascinating read by one of the world's authorities on the Arctic, Bill Fitzhugh. Wilfred Richard's photography is outstanding. Far more depth than your average beautiful coffee table book.

An informative and first-class effort, content filled text on key thoughts, and great images and photos. Robert W, Corell

An excellent book with wonderful photos about an intriguing part of the world.

very interesting
