Goodnight Pharm: 350 Brand And Generic Drug Names With Classifications

Synopsis

I've had feedback from students that they just want me to read them drug names and mnemonics so they can put in their earbuds before they go to bed before their board exams. I've got three five year olds, I don't have time to do the heavy lifting you all do as narrators. In *Memorizing Pharmacology: A Relaxed Approach*, which will sell over 6,500 audiobook copies in its first year, I only had the narrator complete 200 drug names in a seven hour book. There is a list of 350 later in the book, but I thought, who in the world would want to listen to 350 drug names in a row? So I omitted it. There was an answer to that rhetorical question, health professional students studying for a board exam that are exhausted from family, work, and school want to listen to it.

ASIN: B0716P6Y15

Best Sellers Rank: #110 in Books > Medical Books > Nursing > Pharmacology #135 in Books > Medical Books > Pharmacology > Pharmacy #171 in Books > Audible Audiobooks > Science > Medicine

Customer Reviews

I am currently on Chapter 3 of *Memorizing Pharmacology, A Relaxed Approach*. I saw this book online on .com only last night. Given how much I love the book I currently have, the price was irresistible. I bought it and browse thru it. I am awaiting for the audio for this book. This book have the additional top 150 drug names. These are highlighted. The language is of the same tone as Dr Guerra other books. From a quick review of this book, I recommend this book if you owned the *Memorizing Pharmacology*. If not, then you should get both books. I been blessed to have come across these books as a Pharmacy Technician.Alex Ung

The book is similar to "*Memorizing Pharmacology a relaxed approach*" but it is organized in a better

way. The author combines 200 and the additional 150 drug name in the "Memorizing Pharmacology a relaxed approach" into a 350 drug name list. In some way, it creates an easier way to follow the content.

Love this refreshing approach to studying pharmacology. It reinforces what your studying in pharmacology textbooks, and adds a few tips for keeping it locked in your memory along the way. Being able to study while doing housework, driving, or exercising is essential to finding time to study while busy.

It was exciting to see another rare non-fiction offering from the narrator James Gillies.

Great review book to listen to while commuting!
