BRS Pharmacology (Board Review Series)

Synopsis

Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. BRS Pharmacology is designed for medical students, dental students, and other students preparing to enter the health care professions. It is intended primarily to help students prepare for licensing examinations, such as the USMLE, but can be used for course review or as a supplementary text. This book presents succinct descriptions of how drugs act on the major body systems, providing readers with vital information without overloading them with extraneous details. Written with a body systems approach, the book begins with a chapter devoted to the general principles of drug mechanisms, and continues with chapters that detail how drugs act on the major body systems. Other chapters discuss numerous popular drugs, like autocoids, ergots, anti-inflammatory drugs, and immunosuppressive agents. Readers will also learn about drugs used to treat anemia, disorders of hemostasis, infectious diseases, and cancer. Additionally, the text covers pharmacological principles associated with toxicology.

Book Information

Series: Board Review Series

Paperback: 384 pages

Customer Reviews

Purchase went well and item arrived fast, all as expected! I'm leaving 5 stars but I'm not paid for this nor do I get items for free.

I was looking for something better than my text, this was about par with my text. Not very in depth, so for me in NP school, not really helpful relative to the other resources available.

Questions were very helpful in reviewing for exams. Diagrams also helped explain things as well.

Useless, use pharmcards for board studying, and just use your lectures for med school exams. I didn't feel like this book elucidated very many useful concepts.

great book. just not very useful for me

Excellent

great

grt book
