The Albertosaurus Mystery: Philip Currie's Hunt In The Badlands (Fossil Hunters)

Synopsis

In *The Tiny Titanosaurs*, young readers journey to Argentina with paleontologist Luis Chiappe as he makes a major discovery. Amidst a nesting ground filled with thousands of dinosaur eggs, Luis and his team were the first to find both skin and bones from unhatched baby dinosaurs. If the babies had survived, they would have grown to be some of the largest animals that ever walked the earth. What disaster kept the eggs from hatching? Discover the answer with Luis and his team. Full-color photographs, a map, and an exciting narrative text will inspire the budding fossil hunter in every child.

Book Information

Lexile Measure: 760L (What's this?)

Series: Fossil Hunters

Library Binding: 32 pages

Publisher: Bearport Publishing (August 1, 2006)

Language: English

ISBN-10: 159716254X

Grade Level: 3 - 6

Customer Reviews

"This interesting [7] book series looks at a favorite topic of young readers in a new way. Focusing on the hunt for dinosaur fossils rather than the dinosaur itself gives the stories an adventure story feel? [it] will appeal to the young dinosaur enthusiast and the older dinosaur expert hungry for more about their favorite subject. Recommended."

Mrs. Burling's reading class really enjoyed this book. Some of us more than others. We enjoyed that

this book was a mystery at the end, there is still more to learn. It made many of us want to learn more about dinosaurs. We also liked that this book gave us lots of new information!
