Best Sellers Rank: #4,502,229 in Books (See Top 100 in Books) #88 in Books > Science & Math > Nature & Ecology > Field Guides > Insects & Spiders #144683 in Books > Sports & Outdoors

Customer Reviews

This work is not just a book on beekeeping, for to view it as such would be grossly short-sighted. Rather, it is almost a treatise on the philosophical aspects of the joys of a simpler, more natural life-style, and beekeeping is only the vehicle the author uses to define the terms.

Richard Taylor's fascination with the honey bee started when he accidentally found 2 hives belonging to a stranger. He soon had an apiary of two colonies and was selling comb honey. But college and the war interrupted his beekeeping. After the war, and more college, he became a teacher of Philosophy. But bees came back into his life in the mid-50's and remained a passion until his passing in 2003. During those years, Richard taught Philosophy in a dozen or so Universities, ranging from Brown to Columbia, and published several books, most in philosophy, some in beekeeping. The world of philosophy, the world of bees and his family made Richard "the happiest man on the face of the earth."

All of Richard Taylor's books on beekeeping are a delight.

I have read and re-read this book. A masterpiece when you as reader are so often moved to tears

and spellbound in the wonder of Dr Taylor's world and he and the bees let you in!
