Mild	< 30	None	None
Mild-Moderate	30-40	Mild	Mild
Moderate	40-60	Moderate	Moderate
Severe	> 60	Severe	Severe

Synopsis

Pocket-sized laminated card offers quick access to instructions on how to read an ECG. Includes tamponade vs. cardiomyopathy, differential diagnosis, abnormal LV filling patterns, estimation of right atrial pressure, normal diastolic indices, classification of diastolic dysfunction, and more. For clinicians.

Very Helpful! I've been a nurse for 12 years, and specializing in cardiology for 2 years. This will help me feel more confident and be handy for everyone on our staff- I'm keeping it at my desk for everyone's reference. Thanks! *Fast Shipping!*

Handy. I am a reader at a hospital, and refer to the cards for normal values. Two problems:1.Print is a bit small2. Its time to bring them up to date.

i'm still in school but already seeing it useful in clinic work. quick guide with most common normal values. I took the button off so i can flip 2 pages easily.

great resource

Good set

Great information but way too small, both text and images need to be viewed with a magnifying glass

Excellent tool when you doing an echocardiogram.

Hard to read the fine print on these in a dimly lit room. Too much info on cards.
